

***This is a compact, single-page application for training auditory recognition of time in the chosen language.***

### Start App

The screenshot shows the 'Clock Listening Trainer' (CLT) application interface. The title bar includes the CLT logo, the text 'Clock Listening Trainer', the version 'version 1.3.14', and the developer's name 'Oleksii Pokormiakho'. The interface is set to 'English'. On the left, there is a list of five time intervals: 4:25, 10:15, 15:25, 2:50, and 0:30. Each interval has a small icon of a clock and a play button. On the right, there are settings for 'Speed' (1.0), 'Delay (ms)' (2000), 'Language' (NL), and 'Voice' (Dutch Netherlands (nl\_NL)). At the bottom, there are three buttons: 'Rnd' (with a random icon), 'Start', and 'Reset'.

CLT Clock Listening Trainer  
version 1.3.14

Oleksii Pokormiakho

Interface: English

Speed 1.0

Delay (ms) 2000

Language NL

Voice Dutch Netherlands (nl\_NL)

Rnd Start Reset

***In this program, the user can choose the interface language, set the pronunciation language to match its natural speech, adjust the speaking speed, and control the pause between words. The user can practice a single selected time or a series of five different times, with an option to generate random times.***
